FIGHTER®

COMPANY INTRODUCTION

With the cordial cooperation and strong support of friends at home and abroad, our factory has rapidly developed into a specialized factory, which has more than 20 years manufacturing experience with a professional team of high grade engineering.

We occupying more than 20,000 square meters for workshop, and has passed the ISO9001 quality system authentication.

The products are all manufactured in accordance with the international standard and U.S.ANSI specification Grade Two & Grade Three.

Our main products are including locks, padlock, and building hardware, also regular keyways: Kwikset, Schlage, Yale, Wesiser & C4 as well as Computer Key, Cross Key are available for your choice.

We actively develop new products, including the latest product "intelligent digital locks" sets, which combined digital, intelligent and mechanical at an organic whole, with its high technical contained and high anti-theft performance, products are enjoying a world leading level.

We always regard "Quality, Development, Integrity and Efficiency" as our maxim and follow the principle of "Quality First, Customer Top, Good Honor & Strengthened Management" through developing new products, establishing new markets, our products are selling to worldwide.

We are highly value the communication with you and a long-term relationship

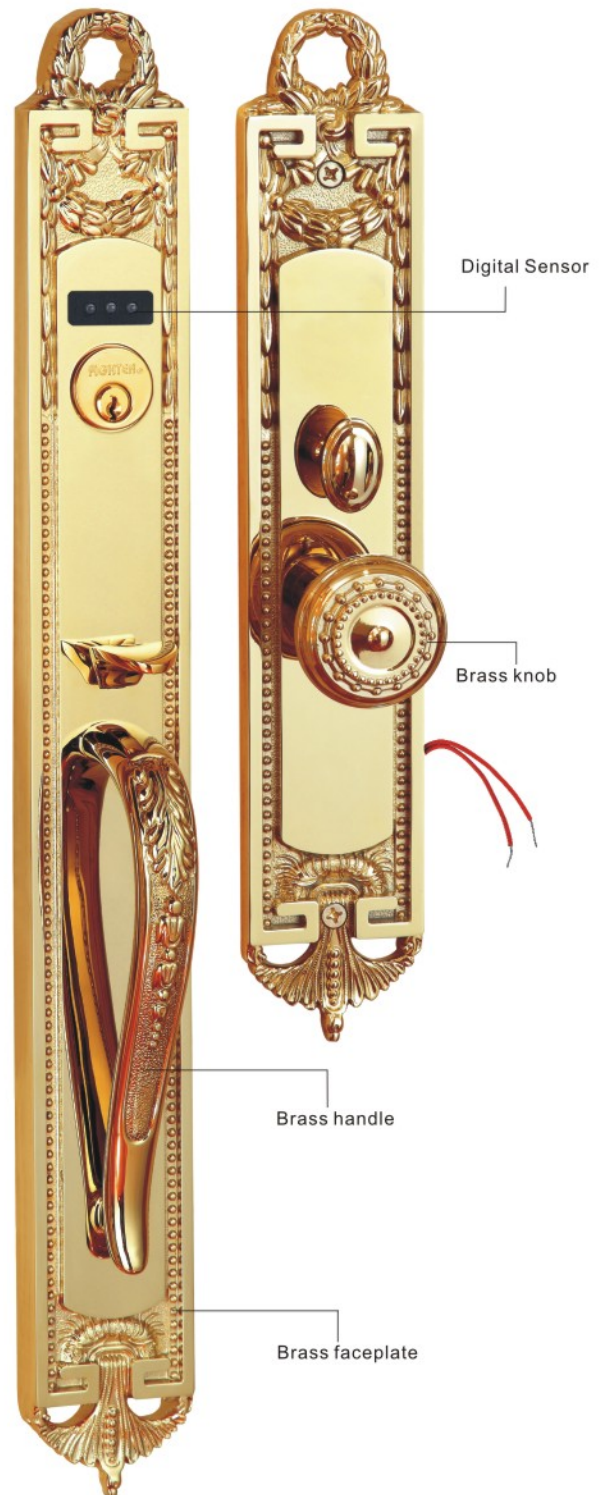

General manager:

Cenfaibum

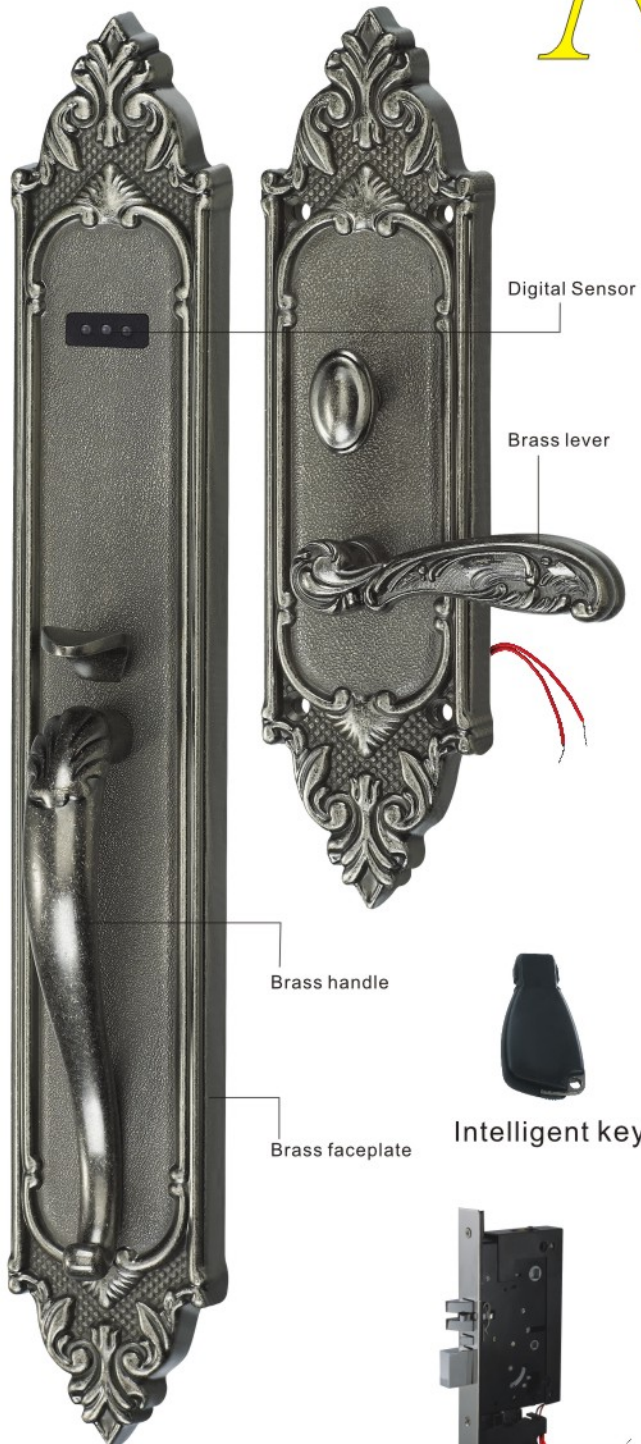

Strongpoints of the FIGHTER DIGITAL LOCK

1. Electrical and mechanical combo "smart key": digital sensing technology as the key password, can not be duplicated and racked, encryption technology for key quantity reaches as high as billions, combination of digital mechanical technology for double security, which overcomes the key easily duplicated phenomenon happens in traditional mechanical.
2. Intelligent management: continuous preparation of 10 "smart keys" in its self-management mode, "smart keys" will automatically deleted in case of lost, and never unlock the door, the management is extremely convenient.
3. Intelligent remote control: users can control the system to unlock, arrange / cancel defense and suspend alarm by input the phone password.
4. Password protection: the 6-digit password can be changed any time at users' need to ensure the safety of the system.
5. Emergency keyless unlock: When confront in the case without keys, users can unlock the door by authenticated password by phone.
6. Security monitoring and time delay function: the lock system is equipped with optional Magnetic control alarm, wireless infrared detection alarm configuration; time delay function, users should leave the fortified area rapidly before the time you set , and the system will automatically enters the armed state.
7. Momentarily control: the system will automatically ring up the 3 groups pre-set phone numbers, and send text messages to notify the user in case of the illegal operation.
8. Supervised arm and disarm function: Users can remotely arm and disarm by phone, the safety is all in your control.

Proximity Card Lock for Hotel

Components of the card lock system (for hotel use)

Computer configuration requirement

CPU*Pentium 466 MHZ, Memory*64M, the remain of Hard disk*600M.Mouse, keyboard, CD Rom, #9 socket etc.

Software under

WINDOWS9X/WINDOWS2000/WINDOWS XP

Functions of the software

Category of password management
Instant display of room situation
Registration and card-issue
Inquiry and print report forms.

Printer(optional)

Print the data of lock-open for inquiry.

Card-Reader

Small, adaptive, and inside power.
Card setting and inquiry with management software

Intelligent lock

Room door control. Open with the intelligent card of same system. Micro-computer inside, imported chip, electrode and copper forging Surface with moistureproof, antiseptis and antirust.

Intelligent card

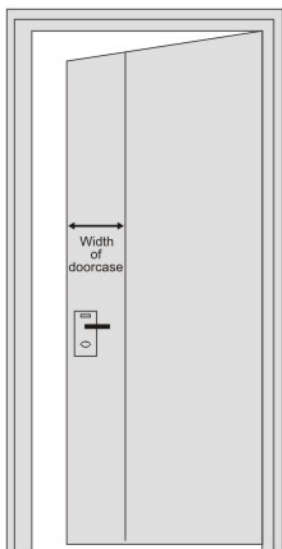

SIEMENS encrypted card, with high capability of anti-fake, and more than 50 thousand times of normal use.

The System Introduction

The way for distinguish door direction

Left open

Right open

Width Request of door case

Upon 90mm 2nd lockset

Upon 110mm general lockset

Recommend door thick:42mm-50mm

Functions of the common-use cards:

Customer card: to open the room during valid time

Cleaning card: to open all the rooms in some area

Floor card: to open all the rooms in one floor

Building card: to open all the rooms in one building

General card: to open all the rooms of the same system

Noted: Every card may be set with the emergency and exit function.

System card: to set the room door

Customer card: ---setting card---clock card---inquiry card---canceling card

Functions of the locks:

Not-disturbed: door is locked from the room which can't be opened by the cards without emergency function

Exit: to make the doors in open or locked status

Clock: only to open the door at a valid time

Time: only to open the door in a valid period

Memory: to record more than 200 pieces of door-open information for inquiry at any time

Warning in low voltage: warning to replace the battery (still in use for 50 times)

Performance Index of the locks:

Working voltage:4.8V---6.0V,>15000 times use

Working electricity:<300 mA

Static consumption:<8 uA

Working temperature: -30℃--+50℃

Working humidity:<95%

Low Voltage Warning:<4.8V

Thickness of the door: 40~55mm

Sketch map of the hotel management system structure

Advanced Windows Platform

Adopting prevalent operation platform and data base platform of Win9x, WinNT and Win2000, Power Builder and Delphi as developing language for personal computer and server.

Reliable and guaranteed capability

Adopting Sybase/SQL, Server/Oracle to save all the data to reassure the safety and stability of the data. Our applied software has not only strict operation level management, daily record of system operation, data backup and restore, but also self-diagnosis, monitoring, warning and system restore, ensuring the safety and stability of the system.

Service

One-year free repair, life-time maintenance. Regular after-sale maintenance service and comprehensive system inspection to assure the stable operation.

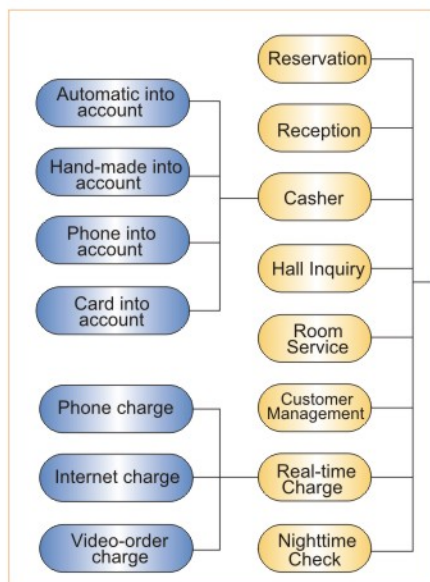

Methods of Maintenance

Provide internet, phone or facsimile instruction, e-mail, or field maintenance.

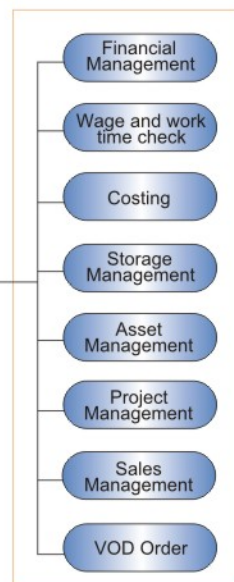

Software Upgrade

We guarantee to provide the latest software upgrade and training service.

Door Catcher
Polished Brass

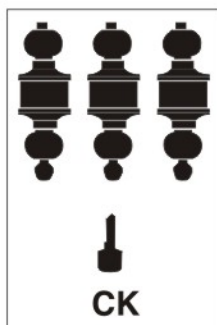

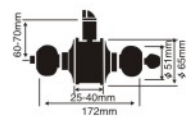

Insert tubular lock, easy to install. Just need to drill three holes at diameter 11mm, And one 22mm hole, it could make more protection to the door, especially fit the thin type lock with 25mm thickness. For 50-75mm thickness, the thicker door lock would be better.

Of the self-touching latch type structure, the insurance latch is sprung automatically when closing the door, it is more convenient to use. Allocating having squarly type, double cylinder type and double hook type insurance latches are available. Double cylinder with inner lever and single cylinder with inner lever are available. Allocating double cylinder with inner lever type, when the inner cylinder unlocked, lock can be opened with the inner lever, And when inner cylinder locked, lock can be opened with keys of both sides. It is installed on the door of 30mm-55mm thickness.

ITEM: 21083-2
Panic Exit Device (for double doors)

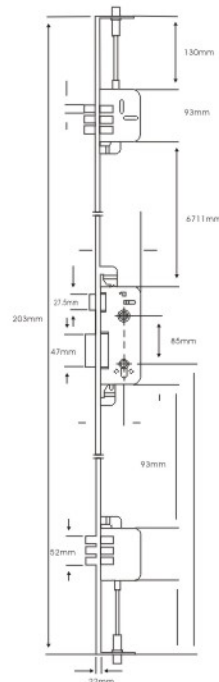

ITEM: 21083
Panic Exit Device (for single door)

Anti-Panic Function Mortise Lock Latch bolt and deadbolt can be opened by pressing the internal handle, without using the key; so people can escape quickly in critical event.

1084

1084A

Mortise door lock with five locking points, three horizontal and two vertical, with euro-profile cylinder. New system of reversible latch. Reinforced dead bolt with anti-crowbar hook (optative) in the central locking point. Only dead bolt with three cylindrical bars in the other two horizontal locking points depart. Enclosed case.

OPERATION: The five locking points with key on both sides, the latch with either key or handle on both sides.

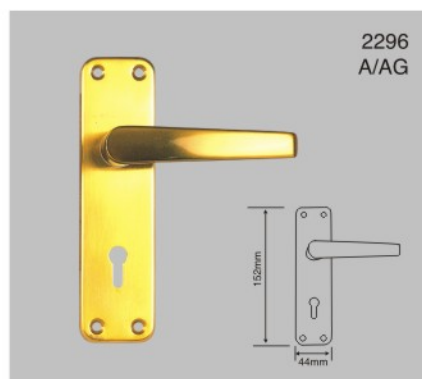

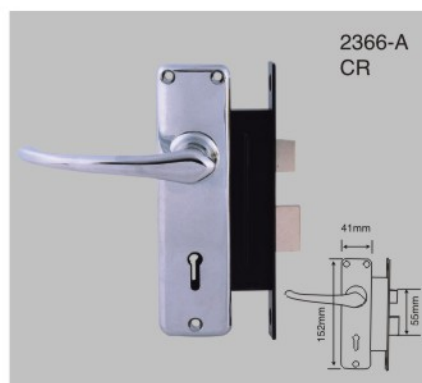

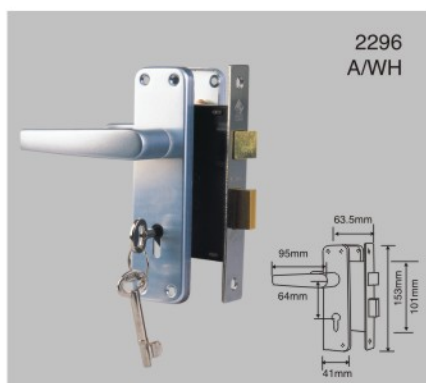

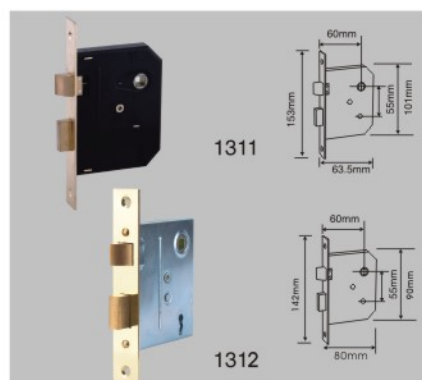

FEATURES:

- OVER 8000 DIFFERENT CODE COMBINATIONS
- INDEPENDENTLY PERFORMANCE TESTED
- SUITABLE FOR EITHER LEFT OR RIGHT HAND DOORS
- AVAILABLE IN SATIN CHROME, POLISHED BRASS OR POLISHED CHROME FINISHES
- CODE CAN BE EASILY CHANGED IN FEW MINUTES
- GUARANTEED FOR 2 YEARS
- ALL SAME SIZE LOCK BODIES SO CAN BE INTERCHANGED
